"A clear tutorial for how to access the learning resources early on. i.e. Moodle, GMetrix. Also, a tutorial for submitting work."

"The online classrooms have been very beneficial, and I have found that this has helped me a lot with exam preparation."

"I would like to potentially see multiple ways of learning the exam resources to help with different learning styles (Visual, Aural, Read/Write and Kinesthetic)"

...We did

We now have a bespoke learner SharePoint with a full onboarding session for every learner on programme. OneFile is used for submitted work and tutorials are provided by assessors.

Once on programme, Primary Goal offer a variety of teaching and learning methods including:

Auditory/ Visual – Virtual Classroom Delivery
Read/ Write – Skillpipe E book study
Kinesthetic/ Practical – Practise Labs
Learners can book bespoke 121 sessions with the Primary Goal support desk if there are areas in which they feel they need further development.

"Possibly more regular and relevant tasks such as; monthly task or quizzes that relate exactly to the exam you are taking."

"Communicate when changing systems (submitting work has changed twice for me.)"

"More clearly defined portfolio work and support with portfolio work."

...We did

We have added more quizzes to both our Moodle and Socrative platforms. With the implementation of OneFile, all learners now have assigned mocks and exams relevant to their vendor qualifications.

We have implemented OneFile as our chosen ePortfolio system which provides a clear way of submitting learner portfolio work.

We have worked in partnership with our EPAO, BCS, and have implemented a portfolio progress form that maps naturally occurring evidence in the workplace to the competencies and behaviours required for the apprenticeship standards.

"The block release delivery method does not work for us as an employer as the time out of school is too much."

"The terminology of the 'Employer Reference' is misleading as it implies the document must be a reference. It does not give any indication of how technical the reference must be for the apprentice, as required for their end point assessment."

"Schools are not aware of the progress of their apprentice on their qualifications or coursework. Some have had informal feedback, but no detail."

...We did

We have implemented a full 2019 virtual classroom delivery timetable. We run exam virtual classrooms all year round, so employers/ learners have the flexibility to decide the best times to release their apprentice for their 20% off-the-job.

We have now changed the Employer Reference to 'Technical Testimony'. This ensures employers are aware of the requirements of the reference, to portray the technical knowledge and skills the apprentice has become competent in over the apprenticeship.

Primary Goal have implemented OneFile as an ePortfolio and tracking system. All employers have individual logins and access to their learner's progression. All employers are required to attend review meetings at least every 8 weeks.
